OVERVIEW

Cola[®]Mate DSLS is a very mild, nearly colorless, sulfosuccinate derived from a three mole ethoxylated lauryl alcohol. Cola[®]Mate DSLS provides excellent foam properties which can be enhanced by blending with sodium laureth sulfate. The combination of these two surfactants provides a product that is mild to both skin and eye, has good foam performance, and improves viscosity response. This grade is preserved with KATHON[™] CG.
