

# Cola<sup>®</sup>Trope 555

---

## DESCRIPTION

**Cola<sup>®</sup>Trope 555** is an alkaline stable surfactant designed for formulating low foaming, liquid cleaner concentrates containing comparatively high levels of caustic and/or other alkaline compounds. **Cola<sup>®</sup>Trope 555** exhibits optimum detergency and low foaming properties at low application temperatures (<60°C).

## TYPICAL PROPERTIES

Appearance @ 25°C	Clear liquid
Specific Gravity @ 25/25°C	1.27
Water	34 – 40
Solubility in 30% NaOH	Clear at 1% and 5%
pH (5% aqueous)	6.0 – 7.5
Draves Wetting:	1% active <b>Cola<sup>®</sup>Trope 555</b> in 20% NaOH: 10 seconds

## APPLICATION PROPERTIES

- A low foaming hydrotrope designed for mid-range temperature applications (<60°C).
- Ideal for use in mixed builder systems such as silicates/phosphates/carbonates.
- Can be easily sprayed onto powdered products such as automatic dish detergents.
- Suitable for demulsifying formulas to provide wetting and oily soil removal.
- Good oxidative stability for use in bleach and peroxide applications.

## Cloud Points in 15% NaOH with 1% Huntsman L12-6

## % COLATROPE 555 Required for Clarity at 25°C with 1% Huntsman L12-6 in NaOH
